

620 Community Management is a community management company that approached Project 1000 to develop their company brand for their new business. Their main goals were to create a professional logo and brand, along with an easy to use website that would cater to new and existing clients.

Gayle Hagensick, the President of 620, hired Project 1000 for the job.

We constructed a great color scheme to represent their brand. Our design team created a strong logo that fit their industry and business. With the logo designed, we extended the brand to their business cards and website design to create a consistent brand image for their business. The end result was a professional brand with a clean and modern website which met all their needs. Project 1000 maintains the site as well as handles 620's marketing materials.

## Client Testimonial

*"I attended a gathering and met a new company that was starting a community management. They referred Project 1000, advising me that they are great with building websites, and I reached out to them and held a meeting. It was a wonderful meeting! I really liked the vibe, the friendliness, and the personalization. They were there for me every step of the way, at every given moment, even when I needed something at any given moment. Alicia and Dee are wonderful to work with. Their attention to detail is great! Service has been impeccable and the products have been wonderful. I couldn't ask for a better team to walk this journey with me and the adventure I'm on."*
